Freeware-License agreement

Preamble

The following agreement governs the rights and responsibilities between you (the "Partner") and the Novalnet in relation to the cost-free software solutions service and support provided by Novalnet, by connecting your e-commerce systems to the payment platform of Novalnet services, which Novalnet offers in accordance with a service contract to its partners, are not affected explicitly by this agreement. From this particular agreement, is not explicitly affected the services Novalnet under the contract between the parties to the service contract partners are providing. By installing and using the software, you automatically confirm that you have read this freeware license agreement and agree with it. If you do not agree to these conditions, as a partner, please do not install and use the software.

License

Novalnet grants you a non-exclusive, free of charge right of usage of the payment modules provided by Novalnet free of charge and all further modules Novalnet publishes elsewhere whose duration is limited to the duration of the service contract between the parties involved. According to the license agreement, you may install the software on one or more computers and use them. The license for the software is free. The partner agrees to the usage of the payment modules and/or parts of modules exclusively for the Novalnet-provided services, mentioned under the treaty/agreement. The partner is not entitled to any technical support of any kind from Novalnet. Novalnet is therefore not obliged to ensure the maintenance or revision or development of the software.

Copyright

All title, ownership rights and intellectual property rights to and from the software, as well as all copies of the software, and any related documentation, are the property of Novalnet (<https://www.novalnet.de>). All rights are reserved. Novalnet reserves legal measures in case of a breach of this agreement.

Guarantee and liability

The payment modules will be explicitly made available "as they are defined". For the correct functioning of the payment modules and/or parts of the payment modules, Novalnet does not provide guarantee. Similarly Novalnet assumes no liability for damages and/or consequential damages, directly or indirectly which can be associated with the use of Novalnet cost-free payment modules, unless the damage is intentional or through gross negligence. Not part of this disclaimer agreement, is damage caused from injury to life or health.

Legal claims and severability clause

The laws of the Federal Republic of Germany will be applicable. The place in a court of law or going to court will be Munich. Should any present or future provision of the agreement, in whole or in part, become invalid, for reasons other than the § § 305-310 of the Civil Code (BGB), the validity of the remaining provisions of the agreement will not be affected. The parties shall replace the ineffective, invalid or unenforceable provision by a valid one that will be void in its legal and economic substance, of the ineffective or not feasible provision, and also in compliance with the overall purpose of the agreement. The same applies, if after the conclusion of the agreement, there are gaps or loopholes found in the agreement. The provision of § 139 BGB (severability) is totally excluded.

1. General

Novalnet is a leading payment institution offering online gateways for processing online payments. Novalnet provides online merchants, user-friendly payment modules for all major shop systems as well as for self-programmed websites. The product and service portfolio is very comprehensive and includes all commonly used payment methods of online payment. These include a variety of intelligent fraud prevention modules, free technical support, an automated accounts receivable management system, a comprehensive subscription and membership management, as well as a very useful affiliate program. The experienced and international team of specialists at Novalnet is committed to support online merchants with in-depth knowledge and to work together with them hand in hand to increase their revenue and the quality of their online payment.

Novalnet is accredited by the BaFin as a payment institution. Novalnet meets all the requirements set down by this supervisory authority and thus officially offers its merchants, in all areas, a fully legally compliant service. This provides the best protection against fraud and swindle for merchants and their customers. This official accreditation as a payment institution is a seal of approval which should be a must for every online merchant searching for a payment service provider.

Novalnet can be found on the official list of BaFin approved Payment Institution. For further information, please refer to <http://www.novalnet.com>

About the WooCommerce shop system

Transform your WordPress website into a thorough-bred online e-commerce store. Delivering enterprise-level quality & features whilst backed by a name you can trust. Say hello to WooCommerce.

To test the demo shop, use the following link <https://woocommerce-demo.novalnet.de>

2. Functional specification

2.1 Supported payment methods

This plugin supports, processing of the following payment methods via Novalnet platform.

Credit Cards

Visa	
MasterCard	
American Express	
CartaSi	
Maestro	

Online Transfer

iDEAL	
Instant Bank Transfer	
eps (Electronic Payment Standard)	
giropay	
Przelewy24	

Account-based payment methods

Direct Debit SEPA

Direct Debit SEPA
payment with guarantee

Invoice

Invoice payment with
guarantee

Prepayment

Wallet system

PayPal

2.2 Risk and control management

2.2.1 Fraud modules

Novalnet payment module supports the following risk management services

- Double booking blockade
- Blacklist
- Email validation
- Luhn check
- Basic address check
- Credit card bin check
- PIN by Callback
- PIN by SMS

In order to use the aforementioned risk management services, the shop operator is required to enable the **Fraud modules** in Novalnet platform.

For processing of Credit Card payment, the plausibility and validity of the Credit Card numbers using the Luhn check (Credit Card check) is employed independent of the functionality of the fraud modules.

2.3 Integration to the checkout and types of connectivity (interfaces)

Novalnet payment module seamlessly adapts the existing checkout process of the xt:Commerce shop system. Communication and data transfer are performed in the background between the module and the server API of the Novalnet platform. For payments by Credit Card, data is transferred to Novalnet platform via client API during the checkout process for checking and secure storage of Credit Card details at Novalnet.

The status of the completed transactions is sent to xt:Commerce shop system by Novalnet platform, which is processed by the module to synchronize an order in the xt:Commerce shop system.

2.4 Payment Card Industry Data Security Standard (PCI DSS)

The Payment Card Industry Data Security Standard (PCI DSS) is a set of rules, regulations or standards for payments, which refers to processing of Credit Card transactions and it is supported by all major Credit Card companies.

When using the Novalnet payment module for WooCommerce, you, as a merchant, is not required to pass certification according to the Payment Card Industry Data Security Standard (PCI DSS).

The AJAX technology used for the client API of the Novalnet platform ensure that the xt:Commerce shop is never in direct contact with any sensitive Credit Card details, because the consumer transfers it directly from client's browser to the Novalnet platform. During the checkout process, the consumer will not be redirected to other pages (except for Credit Card 3-D secure).

For more information on the Payment Card Industry Data Security Standard, please refer to <http://www.novalnet.com/pci-dss-certified-online-credit-card-payment-secure-internet-payment>

3. Download and installation

3.1 Compatibility and requirements

wordpress

- Version : 4.x

WooCommerce

- Version : 2.2.x-2.6.x

WooCommerce Subscription

- Version : 1.5.x-2.x

Novalnet

- Novalnet merchant account
- Novalnet payment module for WooCommerce

If you don't have Novalnet merchant account, please contact us at sales@novalnet.de. Based upon the request, we can provide you with a test account.

3.2 Steps for installation

3.2.1 Download

Go to the Novalnet website by using the below link and click on the **Module Download** as mentioned in the Fig: 3.2.1 (a).

Link: <http://www.novalnet.com/modul/woocommerce>

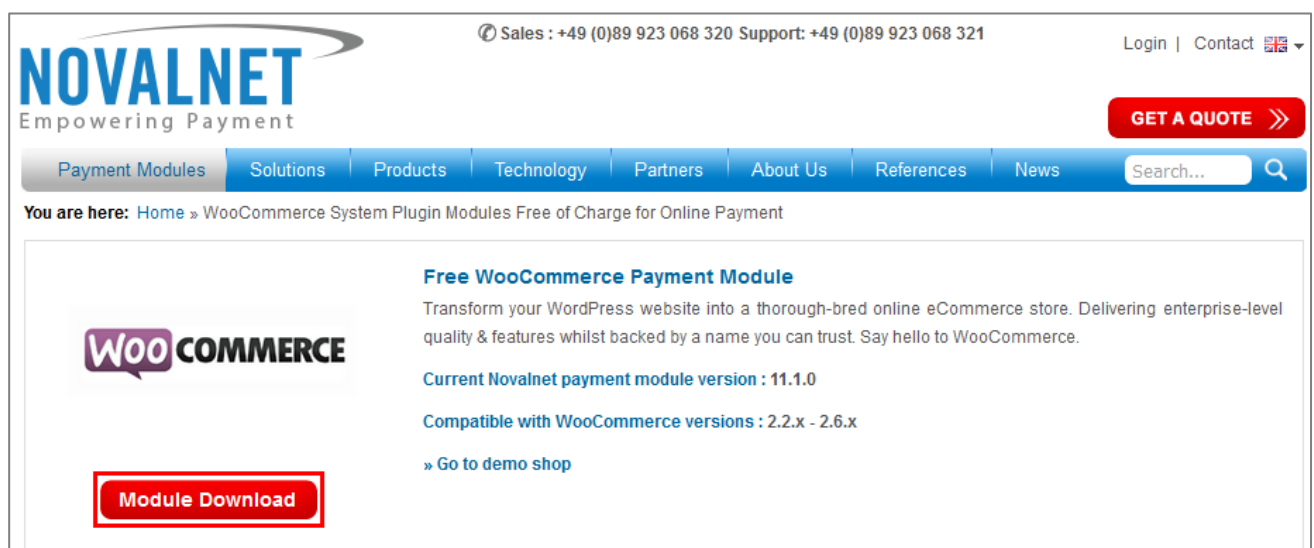

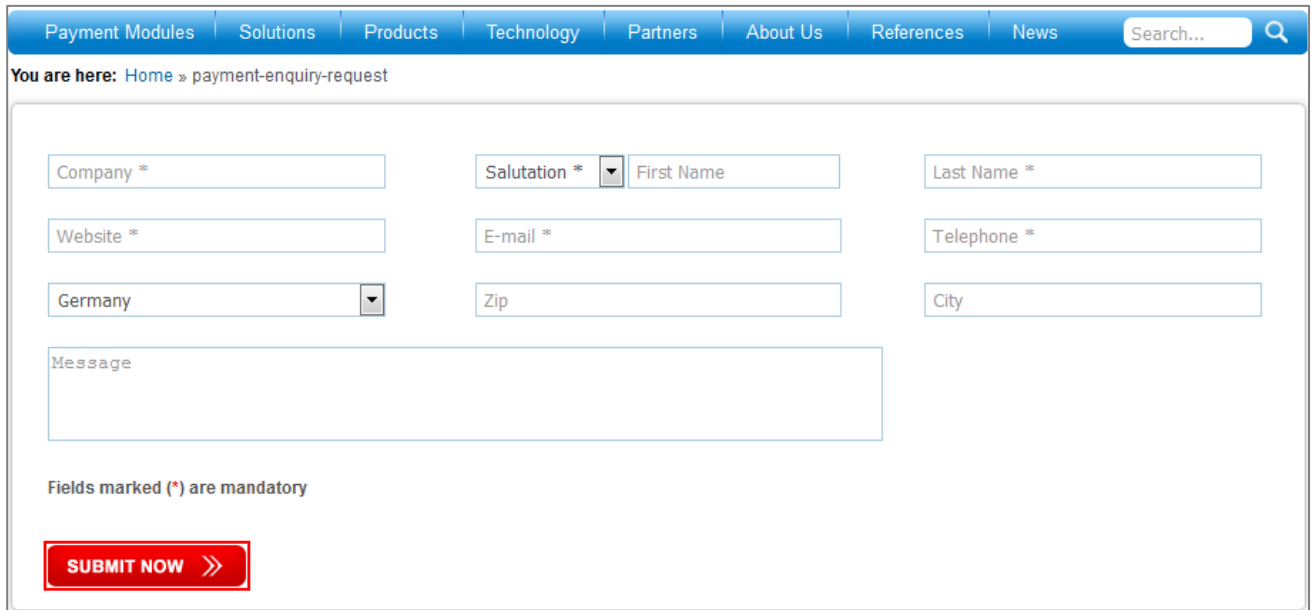

Fig: 3.2.1 (a)

Once you have successfully filled the required fields, click on the **SUBMIT NOW** button. After submitting the payment enquiry request form, the Novalnet support team will contact you to proceed further.

The screenshot shows the Novalnet website's payment enquiry request form. The top navigation bar includes links for Payment Modules, Solutions, Products, Technology, Partners, About Us, References, and News, along with a search bar. Below the navigation bar, the breadcrumb trail reads "You are here: Home » payment-enquiry-request". The form itself contains several input fields: Company *, Salutation * (a dropdown menu), First Name, Last Name *, Website *, E-mail *, Telephone *, a country dropdown menu (currently showing Germany), Zip, and City. There is also a large text area for a message. A note below the fields states "Fields marked (*) are mandatory". At the bottom of the form is a red "SUBMIT NOW" button with a double arrow icon.

Fig: 3.2.1 (b)

Note:

Kindly, do all the necessary steps mentioned in the readme file **woocommerce_novalnet_readme.txt**.

4. Configuration

4.1 Plugin installation

To upload the Novalnet plugin, go to **Plugins** → **Add New** from the admin end.

Fig: 4.1 (a)

Click on the **Upload Plugin** button.

Fig: 4.1 (b)

Browse the Novalnet payment plugin **woocommerce-novalnet-gateway.11.1.0.zip** and click on the **Install Now** button to install the Novalnet payment plugin.

Fig: 4.1 (c)

Activate the uploaded plugin by clicking on the **Activate Plugin** button.

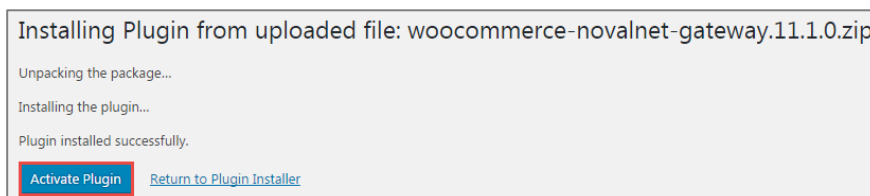

Fig: 4.1 (d)

Once activated, the Novalnet plugin will be available in the menu **Plugins** → **Installed Plugins**.

Fig: 4.1 (e)

Table 4.4.4

4.4.5 PayPal

Field	Description
Shopping type	Based on the selection of shopping type, the payment will proceed with one click shopping or zero amount booking.

Table 4.4.5

4.5 Fraud modules configuration

We have integrated the fraud modules (PIN by callback and PIN by SMS) for the below mentioned payment methods

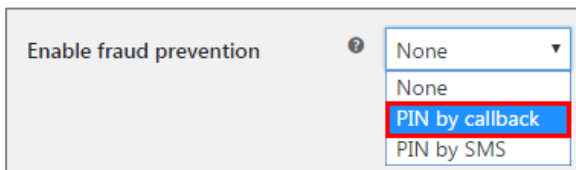

- Direct Debit SEPA
- Invoice

This service is only available for the customers from DE, AT and CH.

Kindly, configure the **Minimum value of goods for the fraud module (in minimum unit of currency. E.g. enter 100 which is equal to 1.00)** to control the respective fraud modules to be displayed in the web shop.

PIN by callback

In a first step of the PIN by callback system, the customer has to enter his telephone number and soon after the customer enters his/her telephone number, the customer will be called back on his/her given telephone number. Now, the 4 digit pin will be provided to the customer via phone call. The customer must enter this 4 digit pin on the merchant's page, to authorize himself/herself to process the order. Through this method, the customer can be identified in real time and the fraud intentions can be blocked at the initial stage. As this check is quite effective and cheap, it is recommended by Novalnet for all merchants in the e-commerce field.

The screenshot shows a form with the label "Enable fraud prevention" and a dropdown menu. The dropdown menu is open, showing four options: "None", "None", "PIN by callback", and "PIN by SMS". The "PIN by callback" option is highlighted with a red rectangular box.

Fig: 4.5 (a)

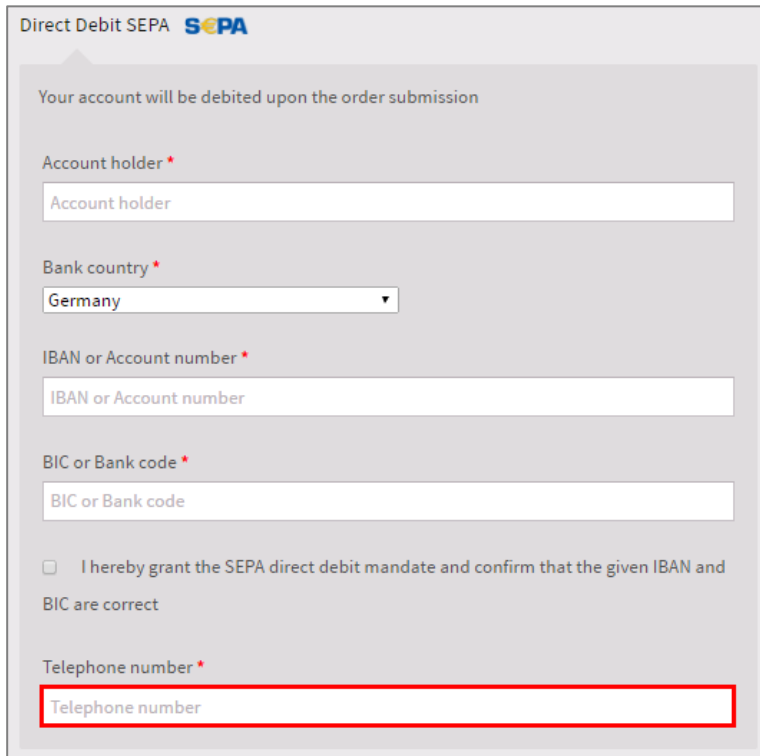

Select the fraud prevention (**PIN by callback**) in the **Enable fraud prevention** option and Click on **Save changes** button to update/save the changes made.

A blue rectangular button with the text "Save changes" in white.

Fig: 4.5 (b)

Once it has been enabled, it will display the **Telephone number** field along with the Direct Debit SEPA form as mentioned below in the web shop.

Direct Debit SEPA **SEPA**

Your account will be debited upon the order submission

Account holder *

Account holder

Bank country *

Germany

IBAN or Account number *

IBAN or Account number

BIC or Bank code *

BIC or Bank code

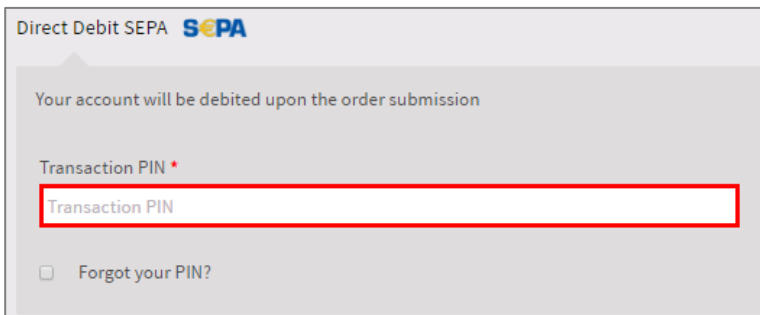

☐ I hereby grant the SEPA direct debit mandate and confirm that the given IBAN and BIC are correct

Telephone number *

Telephone number

Fig: 4.5 (c)

Fill the mandatory fields and proceed further. Later you will receive a PIN via phone call to the given number. Enter the valid PIN number in **Transaction PIN** field to success the order.

Direct Debit SEPA **SEPA**

Your account will be debited upon the order submission

Transaction PIN *

Transaction PIN

☐ Forgot your PIN?

Fig: 4.5 (d)

If you forgot the given PIN, select the **Forgot your PIN?** check box to get the new PIN to success the same.

PIN by SMS

In this process, the customer receives a PIN via SMS on his/her mobile phone which he/she has to enter on the merchant's web page, before the order is authorized.

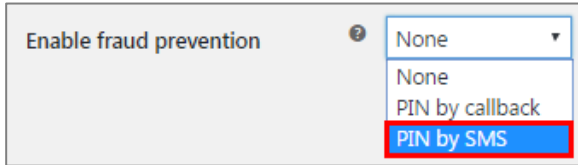

Fig: 4.5 (e)

Select the fraud prevention (**PIN by SMS**) in the **Enable fraud prevention** option and Click on **Save changes** button to update/save the changes made.

Save changes

Fig: 4.5 (f)

Once it has been enabled, it will display the field **Mobile number** field along with the Direct Debit SEPA form as mentioned below in the web shop.

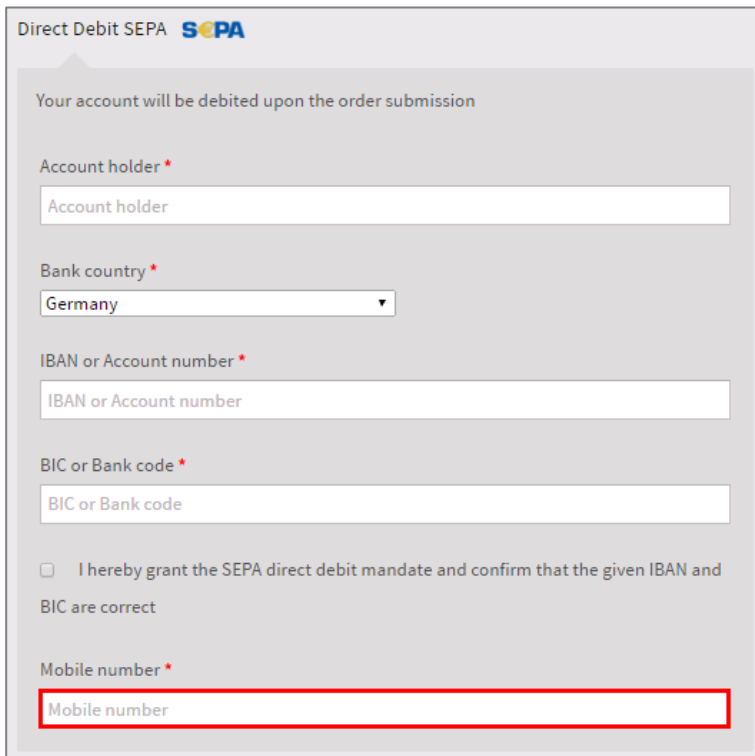

Fig: 4.5 (g)

Fill the mandatory fields and proceed further. Later you will receive a PIN via SMS to the given number. Enter the valid PIN in the **Transaction PIN** field to success the order.

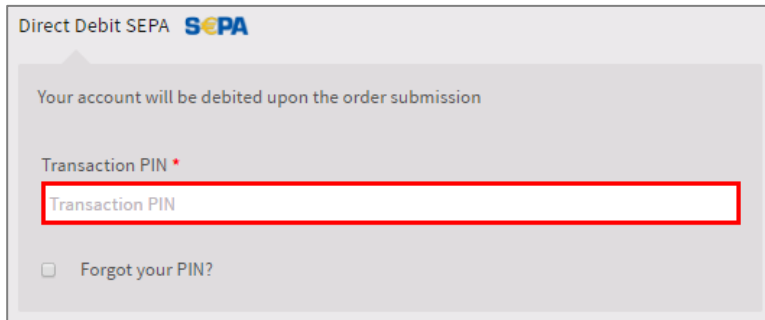

Fig: 4.5 (h)

If you forgot the given PIN, select the **Forgot your PIN?** check box to get the new PIN to success the same.

Field	Description
Minimum value of goods for the fraud module (in minimum unit of currency. E.g. enter 100 which is equal to 1.00)	In case an order amount exceeds mentioned limit, the fraud modules will be displayed and processed accordingly for the particular payment.

Mobile number	Enter the valid mobile number to get the PIN via SMS to success the order.
Transaction PIN	Enter the valid PIN to success the order.

Table 4.5

Note: To process fraud prevention features successfully, kindly configure your server IP address on Novalnet administration portal.

4.6 Merchant script configuration in administration portal

The merchant script is necessary for keeping your database/system actual and it synchronize with the Novalnet transaction status. Your system will be notified through Novalnet system (asynchronous) about each transaction and its status.

Follow the below mentioned step to update the merchant script URL in Novalnet administration portal for merchant script execution.

After logging into Novalnet administration portal (<https://admin.novalnet.de>), please navigate to **PROJECTS** menu and then select an appropriate project by clicking on it.

Fig: 4.6 (a)

Select the **Project Overview**, as mentioned below.

Fig: 4.6 (b)

To configure the same, click on the **Edit Project Overview** link in the right top corner. Now, you can configure **Vendor script URL** as shown the below.

Fig: 4.6 (c)

4.7 PayPal API configuration in administration portal

Follow the below mentioned steps to update the PayPal API configuration in Novalnet administration portal for merchant script execution.

After logging into Novalnet administration portal (<https://admin.novalnet.de>), please navigate to **PROJECTS** menu and then select an appropriate project by clicking on it.

Fig: 4.7 (a)

Select the **Payment Methods**, as shown below.

Fig: 4.7 (b)

Click on **Configure** link near PayPal as shown below.

Fig: 4.7 (c)

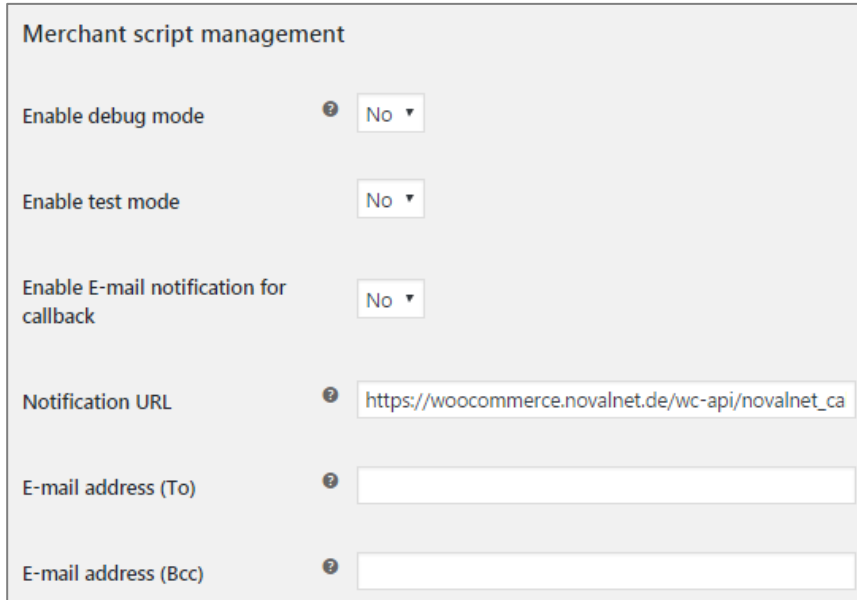

Configure the API details in the appropriate fields and click **Update** button as shown below.

A form titled 'Paypal Configuration' with a red 'X' icon in the top right corner. It contains three input fields: 'API User Name*', 'API Password*', and 'API Signature*'. Below these fields is an orange button labeled 'Update'.

Fig: 4.7 (d)

4.8 Configuring merchant script E-mail settings

To receive email from merchant script, you need to configure the below mentioned parameters in the **Merchant script management** under **Novalnet Global Configuration**.

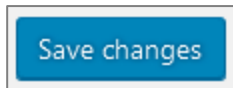

The form is titled "Merchant script management" and contains the following fields:

- Enable debug mode:** A dropdown menu with "No" selected.
- Enable test mode:** A dropdown menu with "No" selected.
- Enable E-mail notification for callback:** A dropdown menu with "No" selected.
- Notification URL:** A text input field containing "https://woocommerce.novalnet.de/wc-api/novalnet_ca".
- E-mail address (To):** An empty text input field.
- E-mail address (Bcc):** An empty text input field.

Fig: 4.8 (a)

Click on the **Save changes** button to update/save the changes made.

A blue button with the text "Save changes".

Fig: 4.8 (b)

Field	Description
Enable E-mail notification for callback	If True , notification mails will be sent to given email address through Novalnet callback script.
Enable debug mode	Set the debug mode as True , to display the text for testing purpose. Note: For LIVE , set the value as False .
Enable test mode	Set the test mode as True , for testing purpose Note: For LIVE , set the value as False .
Notification URL	Notification URL is used to keep your database/system actual and synchronizes with the Novalnet transaction status.

Table 4.8

4.9 Miscellaneous

4.9.1 Order status management

To set the order status, kindly select the respective payment under **WooCommerce** → **Settings** → **Checkout**.

Once the order has been placed successfully, the **Order completion status** of the respective payment will be set as an order status.

A screenshot of a dropdown menu. The label 'Order completion status' is on the left. The dropdown box shows 'Processing' with a downward arrow on the right.

Fig: 4.9.1 (a)

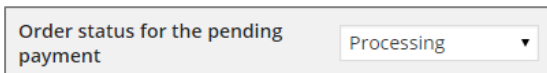

For **Invoice** and **Prepayment** methods, when an end customer transfer the full order amount to Novalnet then the callback script will be triggered and the order status will be changed to **Callback order status**.

A screenshot of a dropdown menu. The label 'Callback order status' is on the left. The dropdown box shows 'Completed' with a downward arrow on the right.

Fig: 4.9.1 (b)

For **PayPal** and **Przelewy24** payment when the transaction is pending, the order status will be set to **Order status for the pending payment**.

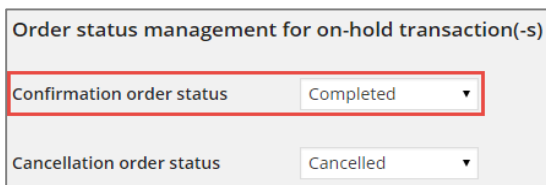

A screenshot of a dropdown menu. The label 'Order status for the pending payment' is on the left. The dropdown box shows 'Processing' with a downward arrow on the right.

Fig: 4.9.1 (c)

To set the **Confirmation order status** / **Cancellation order status**, kindly go to **Order status management for on-hold transaction(-s)** under **Modules** → **Payment Systems** → **Novalnet Global Configuration (V_11.1.0)**.

Once the transaction got confirmed, the order status will be changed to **Confirmation order status**.

A screenshot of a form titled 'Order status management for on-hold transaction(-s)'. It contains two rows. The first row is 'Confirmation order status' with a dropdown menu showing 'Completed'. The second row is 'Cancellation order status' with a dropdown menu showing 'Cancelled'. The first row is highlighted with a red border.

Fig: 4.9.1 (d)

Once the order got canceled (or) fully refunded, the **Cancellation order status** will be set as order status.

8.2 Zero amount booking

In this process, the payment will be processed with amount value as zero. Once the order has been placed successfully, the merchant has to book the order amount to complete the transaction.

We have integrated **Zero amount booking** for the below mentioned payment methods.

- Credit Card
- Direct Debit SEPA
- PayPal

Select **Zero amount booking** option from **Shopping type**.

The screenshot shows a form field labeled 'Shopping type'. A dropdown menu is open, displaying four options: 'Select shopping type' (with a downward arrow), 'Select shopping type', 'One click shopping', and 'Zero amount booking'. The 'Zero amount booking' option is highlighted with a red rectangular border.

Fig: 8.2 (a)

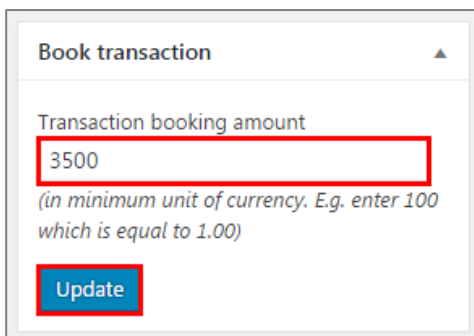

Click on **Save changes** button to update/save the changes made.

The screenshot shows a blue rectangular button with the text 'Save changes' in white.

Fig: 8.2 (b)

After placing the order with zero amount booking, select the order in shop backend, enter the valid amount (in minimum unit of currency. E.g. enter 100 which is equal to 1.00) in the appropriate box and click on the **Update** button to book the specified amount.

The screenshot shows a form titled 'Book transaction'. It contains a text input field labeled 'Transaction booking amount' with the value '3500' entered. Below the field, there is a note: '(in minimum unit of currency. E.g. enter 100 which is equal to 1.00)'. At the bottom of the form, there is a blue rectangular button labeled 'Update'.

Fig: 8.2 (c)

Once the booking process is completed successfully, refer the booked details under **Order Notes** for the respective order as shown below.

Important note: Zero amount booking will not be processed, if subscription is activated.

9. Subscription process

Novalnet is not only a payment service provider, but also offers you in addition an easy option to process recurring payments by our subscription management service free of charge. In this case, an original direct debit or Credit card transaction is followed by the fully automated execution of further payments.

Subscriptions have their standard area of application in the sale of digital goods. Here they serve the purpose of obtaining access to a particular service for a defined recurring period (for example monthly). You have maximal flexibility in your settings. You can offer unlimited as well as time-limited subscriptions. Every time period from one day on is possible as a debit frequency cycle (e.g. three days, one month, beginning of each month etc.).

Novalnet takes over the activation of the subscription on your behalf as well as the continuous monitoring of incoming payments via the comprehensive interface of Novalnet. You can also activate the controls on your own.

Subscriptions with a limited duration will be automatically terminated by us at the end of the subscription period. In order to cancel unlimited subscriptions, we provide your end-users with an additional user-friendly customer portal (<https://card.novalnet.de>). The Novalnet interface also allows you to manage customer subscriptions independently. Our e-payment services enable shop operators to automatize subscription payments and other processes to a larger extend than you can expect from most payment service providers. Request an individual offer for you.

There are two types of subscriptions supported by Novalnet

- Pre-defined subscription
- Dynamic subscription

To proceed with the subscription process, kindly configure the below mentioned fields in **Subscription configuration** under **Novalnet Global Configuration** tab.

Dynamic subscription management

10. Affiliate system management

The Novalnet platform for affiliate programs allows you to organize your affiliate management in an easy and uncomplicated manner. You save time and effort, as the complete processes - from revenue sharing up to the payout to your affiliates - are managed by Novalnet. Additionally, you have the possibility to manage your members via the Novalnet system and to automatize your subscription management.

The Novalnet partner program platform puts an additional interface for the management of your affiliates at your disposal in direct combination with our reliable and safe payment solution. In the course of your cooperation with Novalnet as payment service provider this interface, its implementation and administration are provided to you free of charge. The calculation and payout of commissions is of course carried out reliably and at the highest security level by Novalnet.

Using this service you save considerable time and administrative effort paying out referral commissions and turnover commissions. The automation of the affiliate program via the Novalnet solution renders manual booking and control of affiliate payouts obsolete.

Furthermore as a merchant, you always get an overview in the Novalnet administration portal about the amount of turnover generated by each of your affiliate partners and the level of their turnover commission. At this point, single or combined settlements can be set up. You can create any combination of commission types for your sales partners.

Possible payout options through the Novalnet systems are

- **Pay per Lifetime:** Repetitive commission payouts to affiliate (subscriptions etc.)
- **Pay per Lead:** One-time payment with a fixed amount

You can set up new affiliates in the back end by yourself, evaluate the turnover an affiliate generates and the amount of commission the affiliate received. So you and your affiliate benefit from online payment by Novalnet and a fast payout. With Novalnet as a payment service provider, you can benefit from many useful additional services such as the affiliate program along with e-payment.

Important Note: It is recommended to save the settings of **Novalnet Global Configuration** and the enabled payments once after updating. By doing so, the payment settings for the higher version will be updated, in turn the order status will be updated properly.

11. Supported external plugins

This plugin supports the following WordPress external plugins:

- WooCommerce Subscription
- WooCommerce German Market
- WooCommerce Germanized
- WooCommerce Germanized Pro
- WooCommerce Checkout Manager
- User Role editor
- Gravity Forms
- BackWPup
- W3 Total Cache / WP Super cache
- WooCommerce Sequential Order Numbers Pro
- WooCommerce Print Invoices & Delivery Notes
- WooCommerce Extra Charges To Payment Gateway
- WooCommerce - All in One SEO Pack
- PDF Invoices and Packaging Slips for WooCommerce
- Groups WooCommerce
- WordPress SEO by Yoast
- WooCommerce dynamic pricing
- Contact Form 7
- WooCommerce Accepted Payment Methods
- WooCommerce Deutsch (de_DE)

12. Uninstallation procedure

12.1 Plugin uninstallation

To uninstall the Novalnet payment plugin, go to **Plugins** → **Installed Plugins** from the Dashboard menu.

Fig: 12.1 (a)

Click on the **Deactivate** link under **Novalnet Payment Plugin - WooCommerce**.

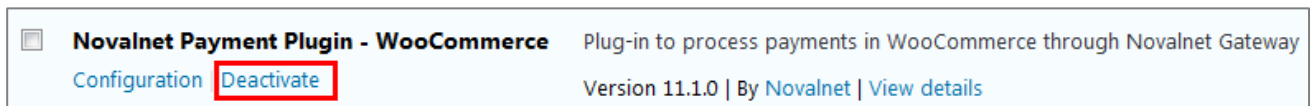

Fig: 12.2 (b)

Now, click on the **Delete** link to delete the Novalnet Payment Plugin from your webshop.

Fig: 12.2 (c)

To remove the entire plugin from your webshop, click on the **Yes, delete these files** button.

Fig: 12.2 (d)

Important note: Kindly, contact sales@novalnet.de / tel. +49 89 923068320 to get the test data to process the payment.
